More than ever, enterprises are seeking ways to drive savings to their bottom-line and increase process efficiencies across the entire organization. Additionally, these same companies are under pressure to comply with mandated regulations and policies such as SOX. E-Procurement continues to be the leading vehicle to deliver the most compelling results and to serve as the foundation for improving overall performance and compliance. With Puridiom's e-Procurement suite of products, you can accelerate your savings, improve transactional efficiencies, place more spend under management and ensure compliance...all impacting the organization's bottom-line and achieving Best in Class results.

Puridiom automates the entire procure-to-pay process by empowering and equipping individuals throughout the company with innovative tools to perform operational and strategic tasks easier and faster, improve controls and compliance, strengthen supplier relationships, and manage key spend indicators. This enables the individuals to focus on the goals and objectives of the organization where they can be more proactive and strategic

with their actions, providing the competitive edge they need to survive or stay ahead of their competition.

Companies using e-Procurement solutions, on average:

- Increased spend under management by 36%
- Reduced requisition-to-order cycles by 75%
- Reduced requisition-to-order costs by 48%
- Reduced maverick spend by 36%

AberdeenGroup

Over the past 24 years, Puridiom has helped our clients streamline and standardize their procurement processes, delivering a real value proposition and offering tremendous opportunity to improve the organization's overall

performance and increase savings. Puridiom enables companies to be Best in Class organizations that gain the greatest value from their e-procurement "footprint" by driving user adoption, placing more spend under management, and investing in technology and complementary services.

Four basic facts to success:

1. *Every dollar saved by procurement goes directly to the bottom-line*
2. *Save 5% to 20% on every dollar brought under management by procurement*
3. *Gain competitive advantage through strategic use of supply management technologies and services*
4. *Companies not utilizing some level of e-procurement need to re-evaluate this decision immediately*

AberdeenGroup

Puridiom's modular design provides the versatility to meet the immediate needs of any size organization and to address the evolving challenges organizations may face as they expand on their e-procurement initiatives. Our procure-to-pay solution offers easy-to-use, feature-rich functions such as online requisitioning, catalog management and punchout, approval workflow routing, budget management, order and contract management, document management, best value sourcing and auctions, supplier performance management, receiving and expediting, inventory

and forms management, order fulfillment, asset tracking, invoice matching, and EIPP. Puridiom is available in an on-demand (fully ASP hosted) or licensed (installed behind your company's firewall) model. In addition to Puridiom's innovative technology, we offer a wide array of complementary services to help organizations achieve the strategic objectives and accelerate bottom-line results. These services include on-demand (ASP hosting) services, help desk support, cooperative purchasing, supplier enablement, spend analysis, and system integration.
